Hi All,

I still have not been able to get my stuff uploaded to git-hub. I am still working on finalizing the BOM with part numbers and qty pricing. I did have a little glitch and the order I placed with Digi-key last week did not ship due to a credit card error on my part. It would have been nice if they sent me an e-mail or something. Anyway, rather than go through that again, I took Chi's advice and ordered the parts again through Mouser. They should be here by Tuesday at the latest, and I ordered enough parts to make 5 full boards. There is only a requirement to have one working prototype, so I will leave it up to each individual if they want to purchase a laser, motion sensor, servos and other associated stuff to make a complete project for themselves. Hope you all have a great weekend.

Esteban

Thank you, Esteban! Could you send me a copy of the Mouser invoice? Thanks!
